

Micro Crystal Aluminium Oxide (MA)

Micro crystal aluminium oxide is used to grind stainless steel, bearing steel, nodular cast iron, etc.

Chemical Composition				
Item	Chemical composition (% , by weight)			
	Al ₂ O ₃	SiO ₂	TiO ₂	Fe ₂ O ₃
Micro crystal aluminium oxide	93.1-96.5	≤0.68	2.20-3.80	≤0.11

Note: Special requirement on chemical composition can be satisfied through discussion.

Optional Particle Sizes	
Product Category	Particle Size
MA	F12-F220 etc.

Note: Special specification can be customized according to customer's requirements.
