

## Ceramic Abrasive Media

### Product Features:

Ceramic abrasive media is made of inorganic materials as the bonds, strictly heated and sintered. Deburring and polishing capacity of the products are excellent, and it's the necessary products of modern luster technology.

### Application Fields:

It is suitable for deburring and edge removal of ferrous metal, nonferrous metal, impact forging, die forging, cast or weld in machine-building, hydraulic, instrumentation and watch industries, etc., also widely used for treatment of stone surface.

Types and Usages					
Type	Size, mm	Application	Type	Size, mm	Application
TC	40×30, 30×24,	For coarse grinding	ACC	20×40, 15×30,	For coarse grinding
TM	25×20, 20×26,	For medium grinding	ACM	10×20, 8×16,	For medium grinding
TF	15×12, 10×8, 8×6,	For fine grinding	ACF	6×12, 5×10,	For fine grinding
TS	6×4, 5×5, 3×3.	For super fine grinding	ACS	3×6.	For super fine grinding
ATC	40×30, 30×24,	For coarse grinding	SC	30, 25, 20, 18,	For coarse grinding
ATM	25×20, 20×26,	For medium grinding	SM	15, 12, 10, 8,	For medium grinding
ATF	15×12, 10×8, 8×6,	For fine grinding	SF	6, 5, 4, 3, 2, 1,	For fine grinding
ATS	6×4, 5×5, 3×3.	For super fine grinding	SS	0.8.	For super fine grinding

Note: Special specification can be customized according to customer's requirements.
